

Asis Elektronik ve Bilişim Sistemleri A.Ş. operates in the smart cities and financial technologies sectors; It is a Turkish company with domestic capital that produces all its systems and equipment with its own resources. Founded in 2007 with the mission of "Smart Technology Management", ASİS Elektronik is a technology company that develops hardware and software products that touch the lives of many people all over the world in the smart cities and financial technologies ecosystems in which it operates.

Our organization; Within the framework of the vision of being a leading organization that produces local and global solutions with value-added technologies, we develop, produce and provide after-sales service to durable, safe and reliable products that exceed our customers' expectations regarding quality. It meets the requirements of the ISO 9001 Quality Management System to increase our quality performance in all our processes; We are committed to continuous improvement by providing the necessary resources.

In this direction, our organization

We will manage future plans compatible with our mission, vision, goals and objectives, in line with the resources and competencies we have,

We will systematically ensure quality and continuous improvement awareness with agile, lean production, traceable and measurable approach in processes covering all areas of activity,

We will work with all our strength to become a leading organization in our sector by managing our principles and activities towards increasing the quality awareness of all our employees and stakeholders in an integrated manner with our other management systems,

We will ensure that a quality culture is adopted throughout the organization and on a process basis, focusing on continuous learning and improvement through measurement and monitoring,

We will develop processes focused on customer demands and needs and provide services using technologies that will maximize customer efficiency,

We will comply with legal regulations, national and international standards, and for this purpose, we will closely monitor the relevant legal requirements on matters concerning our activities and keep this information systematically updated,

We will review our business processes with a perspective of evaluating risks and opportunities and implement approaches that will improve our performance,

We will closely follow and apply technological developments to reduce costs and increase profitability,

We will ensure that employee satisfaction, loyalty and motivation are kept high by considering the satisfaction of our employees, empowering them and supporting their continuous development,

We will increase the satisfaction of our customers with high quality products and services and continuously improve the quality of our processes, products and services,

We will contribute to the country's economy by constantly improving the business volume to make the name of our company and the Republic of Türkiye more known to the world, and by carrying our existing technical, administrative and financial knowledge abroad,

We commit.
