

As Asis Elektronik ve Bilişim Sistemleri A.Ş., while continuing our activities in the fields of smart cities and financial technologies, we ensure our commitment to environmental sustainability through an environmental management system fully compliant with the ISO 14001:2015 standard. In line with our vision of 'Technology Protecting the Future,' we adopt an environmentally conscious approach and commit to adhering to the following principles:

1.Compliance with Legal and Other Obligations

Ensuring full compliance with national and international environmental legislation and other legal requirements at all our locations,

Collaborating with relevant institutions in the process of developing environmental regulations and standards.

2.Reducing Environmental Impacts and Continuous Improvement

Optimizing energy and water consumption in our smart city and financial technology solutions to reduce our carbon footprint,

Adopting circular economy principles to minimize environmental impacts throughout the product life cycle,

Continuously improving our environmental management system to enhance our environmental performance.

3.Resource Efficiency and Clean Technologies

Using the best techniques and clean production technologies to reduce resource consumption,

Increasing the use of renewable energy sources and prioritizing energy efficiency efforts,

Minimizing waste generation, emissions, and the use of hazardous substances in production and operational activities.

4.Assessing Environmental Risks and Opportunities

Identifying environmental risks in our smart city applications and financial technology systems and taking necessary measures to minimize these risks,

Assessing climate change risks and opportunities and contributing to the transition to a zero-carbon economy.

5.Stakeholder Relations and Raising Awareness

Providing training to our employees, business partners, and the entire value chain on our environmental responsibilities,

Effectively managing internal and external communication to raise environmental awareness,

Promoting best practices as an industry leader and supporting environmental consciousness.

6. Emergency and Risk Management

Identifying potential environmental emergency scenarios and taking necessary precautions,

Developing crisis management plans to respond quickly and effectively to potential environmental disasters.

This policy applies to all units, locations, and processes of Asis Elektronik ve Bilişim Sistemleri A.Ş. and is designed in full compliance with the requirements of the ISO 14001:2015 standard. We will continue to focus on continuous improvement in collaboration with all our stakeholders to fulfill our environmental commitments.
